ARIZONA TO HAVE  
BIG COTTON PLANT

Will Be Located in Salt River Valley to Handle the Egyptian Cotton Crop in That District.

Phoenix, Ariz., June 2.—For the purpose of purchasing machinery for use up to date cotton working plant, to be erected in the Salt River valley, H. B. Atkin, president of the Arizona Egyptian Cotton Growers' association, has gone to the east. He will purchase a grain, oil press, roller, baler and loader. It is expected that the plant will be in operation in time to handle this season's crop.

Of late the officers of the association have been investigating the market for cotton products. A stockman in the northern part of the state has offered to buy all the cotton seed that the valley growers can produce. Another offer has been received for all the seed, from a company which expects to retail to other planters.

Last year there were 450 acres of cotton in the Salt River valley, and this year there will be 2500 acres. If the crop is again a success the acreage next year will be not less than 5000. Not all the crop will be handled at the Phoenix plant. It is expected that the plant will be in operation in time to handle this season's crop.

The firm will put in a line of farm implements, having already ordered two carloads of machinery.

Work is expected to begin on the foundation within a week. A wide floating foundation will be used to carry the heavy walls of the building, which will be a concrete structure. The old shops now used by the firm, the buildings already in use, which are of wood, will be used for storage and exhibition places when the big shop is finished.

IN GREEN HEREAFTER

Shamrock green postal cards have been ordered issued by postmaster General A. S. Burleson—Texas, with the green to conform to the rules of the International Postal Union. The postal cards of the lowest denomination have been a buff color in the past, but as the foreign post cards of lowest denomination are printed green, the post office printers to get away on the new set of green for domestic cards.

The explanation for the change is that the green color will be more familiar to foreign mail and her what who are accustomed to using the green cards at home.

Special registry stamps are to be taken after the present crop has been consumed. Instead of having a special stamp for registered mail, the postoffice will accept the ordinary or back lot variety of postage stamps, when well liked and pasted on parcels sent to registered addresses.
